OBJECTIVE

Detail-oriented professional with hands-on experience in Python, SQL, Power BI, and Generative AI, focused on transforming data into actionable insights. Seeking to leverage analytical and AI-driven skills to support data-driven decision-making.

WORK EXPERIENCE

Software Engineer, *Talent Smart Soft Solutions*

2025/01 | Hyderabad

Duration: 1 Year

Projects:

AI-based Communication Assessment System

- Developed an AI-based Communication Assessment System using Python to evaluate text and audio responses.
- Integrated **speech-to-text (Whisper/Vosk)** and NLP techniques for transcription, grammar, sentiment, and readability analysis.
- Used **OpenAI API** for advanced evaluation, scoring, and feedback generation.
- Built a web app with authentication, admin dashboard, and time-bound assessments.
- Automated end-to-end pipeline with real-time processing of audio and text inputs.

Rag Chatbot

- Developed an end-to-end **RAG chatbot using Python, LangChain, and Gemini API for Q&A on PMKVY schemes**.
- Implemented hybrid retrieval (semantic + keyword) using MiniLM embeddings and smart chunking.
- Applied few-shot and Chain-of-Thought prompting with jailbreak protection for improved responses.
- Evaluated performance using RAGAS.
- Built an interactive CLI with streaming responses and confidence scoring.

Playwright Automation Framework

- Developed an end-to-end automation framework using Playwright for cross-browser testing.
- Designed reusable test scripts to **validate UI workflows**, interactions, and network responses.
- Implemented structured and modular test architecture for scalability and maintainability.
- Executed automated test suites using **npx playwright test** with reporting support.
- Improved test efficiency by reducing manual effort and ensuring consistent coverage.

TECHNICAL SKILLS

SQL :

- Strong in **SQL (DDL, DML, DQL)** for data creation, manipulation, and retrieval.
- Used **aggregate functions (COUNT, SUM, AVG, etc.)** for data analysis.
- Applied **joins (INNER, LEFT, RIGHT)** to combine data from multiple tables.
- Implemented constraints (**PRIMARY KEY, FOREIGN KEY, UNIQUE, NOT NULL**) for data integrity.

PYTHON :

- Good understanding of **Python data types** (list, tuple, set, dictionary, string, etc.).
- Knowledge of **flow control statements** (if-else, loops) for decision making and iteration.
- Ability to write **functions** for reusable and structured code.

- Basic understanding of **Object-Oriented Programming (OOPs)** concepts like class, object, inheritance, and polymorphism.

POWER BI:

- Developed interactive dashboards using charts, tables, and KPIs.
- Imported and transformed data using Power Query (cleaning, null handling, data types).
- Built data models with relationships for accurate insights.
- Applied filters (visual, page, report level) for dynamic analysis.
- Used GitHub Copilot (MCP) for DAX generation and data modeling support.

GENERATIVE AI

- Learned fundamentals of **Generative AI and LLMs**.
- Applied **prompt engineering techniques** for effective AI outputs.
- Understood concepts like **embeddings, tokenization, and model behavior**.
- Explored **RAG (Retrieval-Augmented Generation)** and advanced prompting (zero-shot, few-shot).
- Worked with **AI tools/APIs** and explored applications like chatbots and text generation.

CERTIFICATIONS

- Azure Fundamentals(Az-900)
- Google Associate Cloud Engineer
- Power Bi Data Analyst Associate Certifiacte(Pl-300)
- Python Certification — FreeCodeCamp
- Python Fundamentals — Kaggle
- Intro to SQL — Kaggle
- Relational Databases Certification — FreeCodeCamp
- GitHub Copilot Fundamentals (Part 1 & 2) — Microsoft
- Generative AI for Everyone

EDUCATION

B.TECH in Computer Science and Engineering	2020 – 2024
Sreenivasa Institute of Technology and Management Studies, Chittoor	
INTERMEDIATE	2018 – 2020
Sri chaitanya junior college, Tirupathi	
SSC	2017 – 2018
Sree Bhanodhaya English Medium School Etteri, Chittoor
