Certifications

- AZURE FUNDAMENTALS (AZ-900)

Work experience

Software Development Team Lead — Amdocs	Mar 2020 - Present
---	--------------------

- Led the full development cycle including Planning, Analysis, Design, Development, Deployment, Testing, and Implementation of an application in Coldfusion to React JS and Springboot as a Module Lead.
- Investigated issues by reviewing and debugging code, provided fixes, workarounds, and reviewed changes for operability to maintain existing software solutions.
- Experience in Microservices with Java, Spring, Springboot, Kafka and NoSQL and SQL Databases like Couchbase, MySQL, and Postgres.
- Involved in discussions with Architect and PDO to understand the end customer requirement and provide effective solutions.
- Implemented new requirements as per Account's needs.
- Initiated change requests and provided end-to-end support to resolve issues till the code moved on to the production environment.
- Led a team of 8-10 members to ensure seamless project delivery.

System Engineer — Tata Consultancy Services Ltd	Apr 2018 - Feb 2020
---	---------------------

- Designed, developed, and modified software code for State Bank of India GITC, following functional, non-functional, and technical design specifications.
- Developed APIs using IIB Tool and successfully migrated them to the IIB portal at State Bank of India.
- Created Java-based Webservices for the Customer Enterprises Module in the Trade Finance Department of State Bank of India, allowing for seamless back-end integration.
- Integrated the back end with CBS for hosting and consuming Java Web services, ensuring efficient functionality.
- Utilized Eclipse IDE and Apache Tomcat Server for developing and hosting server, optimizing system implementation.

Projects

First Coldfusion Replacement	882 Days
------------------------------	----------

Cold Fusion technology is no longer within TSS standards and hence needed to be replaced. This project's scope was to replace the FIRST application Cold Fusion web pages (285 pages) with a TSS-approved technology(SpringBoot and React JS).

Conversion of all web pages using Cold Fusion to the new TSS-approved technology i.e React JS.

FIRST	549 Days
-------	----------

The project is divided across multiple domains responsible for holding domain-specific tasks.

The project constitutes two sections in development:

(a) The development tasks related to Code development, Code Enhancements, and Code Fixes.

(b) The autonomous processes which keep on running on the UNIX boxes for the functionality like Bill generation etc. a Technology -Java, Spring, Hibernate, SQL.
